SNAP-ON CONNECTOR OPTIONS FOR LED TAPE

INDOOR / OUTDOOR RATED

Our Snap-On connectors are designed to easily connect additional power leads and jumpers or joining 2 rolls together. The connectors do not require soldering; simply cut at the designated marks and snap-on.

LED POWER LEAD

MODEL LED PWR WL 10MM
DIMENSIONS 5/8"W x 5/8"L x 3 FT LEAD

The LED Power Lead adds a pigtail lead to connect the LED tape to your low voltage transformer, after the initial (2) factory installed leads on each end of the LED tape have been used.

(EXAMPLE: If you need (4) 4 ft runs, you can use the (2) 4 ft ends by cutting at the designated cut marks. The middle portion with no leads may now be used by snapping on a power lead.)

LED IN-LINE JUMPER

MODEL LED IL JUMPER 10MM
DIMENSIONS 5/8"W x 5/8"L x 3" JUMPER X
5/8"W x 5/8"L

The LED In-Line Jumper gives you the ability to create designs with a wide range of turns on one continuous run.

(Max run: 32.8 ft for 0.75w & 1.5 models; 16.4 ft for 4.5w model)

(EXAMPLE: If your design requires a 4 ft run with a 90° turn and then another 4 ft run, simply add a jumper in between the (2) 4 ft runs. One strip would have the pigtail lead which would attach to the low voltage cable.)

LED IN-LINE COUPLER

MODEL LED IL CONN 10MM
DIMENSIONS 5/8"W x 5/8"L

The LED In-Line Coupler lets you join 2 LED strips together.

(Max run: 32.8 ft for 0.75w & 1.5w models; 16.4 ft for 4.5w model)

(EXAMPLE: If you need (1) continuous run of 20 ft, you would join a 16 ft LED Tape strip with a 4 ft LED tape strip using the In-Line coupler. One strip would have the pigtail lead which would attach to the low voltage cable.)

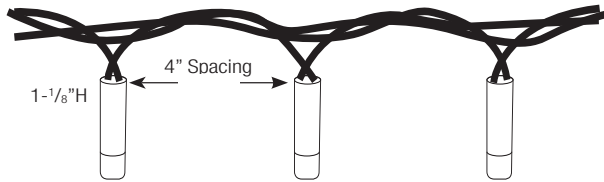

ARCHITECTURAL TWISTED STRING LIGHTING (12V AC)
